How To Use This Template

To turn this document into a template, select File, Save As and then choose Document Template (*.dot) from the Type drop down menu and save the template. You may want to create a new folder for InZones templates. To use the template again, select File, New. Select the template from the list of templates.

Insert the title, subtitle, date and address on the cover page. For the body of your report, use Styles such as Heading 1-5, Body Text, Block Quotation, List Bullet, and List Number from the Style control on the Formatting toolbar.

This report template contains styles for a Table of Contents. The Table of Contents automatically lists Headings 1, 2 and 3 and the page numbers. After you have changed the headings with your own text, select the Table of Contents, right click and pick "update field". The new titles and page numbers will appear.

In addition to producing reports, this template can be used to create proposals, white papers, product descriptions and documentation.

To change the text or graphics the follow these suggestions:

- To change text, select any paragraph and just start typing.
- The cover picture is in the Header so it looks much lighter on screen than it actually is. Print the page to see actual colors.
- To save time in the future, you can save the front cover of this report with your company name and address. For step-by-step instructions on how to preserve your changes with the template, please read the following section.
